WORK EXPERIENCE

Consultant – Technology Strategy | Kearney **Sep 2025 – Mar 2026**

Owned **application rationalization** & **cybersecurity** workstreams for an O&G PSU, shaping enterprise IT strategy & execution

- Translated diagnostics & benchmarking into **detailed execution roadmaps** covering responsibilities, phases & governance; led cross-functional stakeholder workshops & reviews, incorporated feedback, aligned recommendations
- Explored AI use cases with stakeholders & vendors; built an **exploratory POC** using vectors & LLMs to identify duplicate spare-parts

Product & New Initiatives | MoveInSync **May 2024 – Aug 2025**

Founding Product Owner on a new business unit, taking B2B SaaS platform from pilot to scale for employee commute in manufacturing

- Owned & shipped an analytics suite for **10+ enterprise customers** across **3 modules**; used SQL & Metabase for analysis and enabled self-serve KPIs with rider, route & vehicle insights for transport teams & fleet vendors, helping improve operational performance
- Ran onsite discovery for a key early account, diagnosed workflow & data gaps with transport admins, redesigned analytics & trained users to resolve adoption blockers; helped retain the account & drive **25% expansion** to **₹40L total ARR** (annual recurring revenue)
- Shipped a **vendor-billing MVP** with rate slabs & vendor views; iterated with the customer to unblock a **stalled deal** & go-live
- Defined safety, attendance & distance-tracking requirements in **PRDs, user stories & acceptance criteria** in Jira; refined GPS/RFID edge-case logic with engineering to improve data reliability & reduce manual intervention and disputes
- Prioritized reporting & analytics requirements by customer impact, urgency, engineering effort & delivery speed
- Supported **enterprise demos & POCs** with customer-data setup, configs & product walkthroughs
- Prototyped an internal **AI assistant** linking ops data, Jira tickets, and product context to support & implementation investigations
- Built Python/JS tools for root-cause analysis, analytics & data migration to resolve issues and **experiment before full product builds**

Product Intern | JPMorgan Chase & Co **Jul 2023 – Dec 2023**

Contributed to product strategy & execution for a centralized cloud platform for financial statement spreading and credit risk analysis

- Solved user issues in portfolio reports by building a VBA automation workflow, reducing manual effort by **~95%**
- Investigated product issues using **Jira and SQL**, supporting onboarding, feature adoption & platform operations
- Partnered cross functionally with engineering & credit teams to migrate credit portfolios and define **financial-statement data model**s
- Tested monthly Agile releases against **acceptance criteria**; supported KPI & regulatory reporting for management

SKILLS

Product Strategy & Discovery: User Research, Market research, Business Analysis, Solution Design, Roadmapping, Prioritization, GTM
Product Development & Collaboration: PRDs, User Stories, Acceptance Criteria, Cross-functional Delivery, Rapid Prototyping, Agile
Data & Analytics: SQL, Metabase, Advanced Excel/VBA, Product Analytics, Operational Analytics, KPI Definition & Tracking
Tools & Technologies: Python, JavaScript, Prompt & Context Engineering, APIs, RAG, Data & AI workflows, Figma

SELECTED PROJECTS

Shubh Bazaar - Full-Stack E-commerce Platform

- Built & shipped a **full-stack e-com platform** with catalog, inventory, checkout & orders; integrated **PhonePe & Shiprocket** APIs
- Enabled payment verification, webhooks & shipping/tracking; iterated with TypeScript, Supabase, GitHub, & Cloudflare R2

Targeted Malaria Intervention - Data Mining & Predictive Analysis

- Led a data-mining study of malaria prevalence & impact; cleansed & transformed **NFHS data** into a streamlined analytical dataset
- Applied clustering, ML & Apriori to identify **household risk profiles**(wealth, education, sanitation, net use) for malaria susceptibility

EDUCATION

Birla Institute of Technology and Science, Pilani (BITS Pilani) **2020 – 2024**

Bachelor of Engineering in Computer Science with Minor in Finance CGPA: 8.52 | Minor GPA: 9.67

CFA Level II Cleared | FRM Parts I & II Cleared

LEADERSHIP POSITIONS

Vice President, BITS Hyderabad Consulting Group **Jul 2022 – Aug 2023**

- Product design & GTM strategy for a fintech client, **defined features & launch strategy** for MVP launch of their platform
- Redesigned **Product & Pricing model** for an edtech client that was adopted in their live GTM and digital marketing efforts
- Launched **ProdEezy**, a PM mentorship program across 3 campuses, connecting **300+** students **with 20+** product mentors

Secretary, Wall Street Club BITS Hyderabad **Aug 2022 – Jul 2023**

- Led a **90-member finance club**; launched its first newsletter, covering markets & crypto for **~100** subscribers
- Organized trading competitions & workshops with industry veterans, engaging **1000+** students in quant finance, trading & analytics

ADDITIONAL INFORMATION

- Teaching Assistant for **650+** students in Economics 101 + Derivatives courses; managed logistics, queries & evaluated assignments
- **Founding team member, BlockSoc;** led projects & workshops exploring blockchain applications, digital assets, and DeFi at BITS
- **Interests:** Macroeconomics, Geopolitics, Fintech, Emerging Tech, Anime, Formula 1
